

ABSTRACT OF THE DISCLOSURE

A gaming device for providing awards to players. The gaming device includes an award distributor such as an award wheel having a plurality of sections, each of the sections having or defined by first and second coordinates, a plurality of award symbols included on the sections, an illumination device associated with the sections, a section indicator associated with the award wheel and a processor in communication with the award wheel. The gaming device determines the first coordinate of one of the groups of sections. Then, the gaming device or player spins the award wheel and the section indicator determines the second coordinate of one of the sections in the group, which indicates the section. The gaming device provides any award or symbol to the player that is associated with the indicated section
